The Statutes of the General Infirmary at Chester

Chester, 1763

National Library of Medicine

Bethesda, Maryland

CONDITION PRIOR TO TREATMENT

There was no cover. There were remnants of deteriorated leather on the spine. The sewing was missing. Adhesive attachment held some leaves together. The title page was discolored and heavily soiled.

There were tears throughout.

TREATMENT

The text block was disbound. The edges of the text block and heavily soiled leaves were surface cleaned with grated and solid vinyl erasers. The text was washed in a bath of deionized water and deacidified in an aqueous solution of magnesium bicarbonate. The leaves were repaired with Japanese paper and wheat starch paste. The book was re sewn by hand with unbleached Irish linen thread with the addition of new end leaves of handmade paper. The spine was lined with both Japanese and Western paper using wheat starch paste adhesive, and a layer of unbleached Irish linen with PVA adhesive. The book was recovered in a non-adhesive paper cover that is reinforced with acid-free buffered board. The surface pH after treatment was 8.2.
